THE S-K line of tools shown in this catalog is a first quality line, which we believe to be equal to or better than any tools made at any price.

They are made of the finest steels obtainable for the particular purpose for which they are designed, accurately machined to close tolerances, heat treated and hardened to provide strength and long wear, and chrome plated and polished for protection against rust and corrosion.

They are a line of tools built to speed the mechanic's work in this age where speed is necessary if competition is to be met. Streamlined design and light weight commensurate with strength are factors which are all carefully considered by our engineering department in developing these tools.

The wrench set combinations are selected and arranged to meet the individual needs of the mechanic, whether he be engaged in intricate assembly work requiring small tools, or the construction and repair of heavy units where strength and the ability to "take it" are essential.

REPLACEMENT POLICY

All S-K tools are guaranteed against defective material or workmanship. Any tool showing a defect in material or workmanship will be repaired or replaced free of charge, if returned to the factory by the user, provided the tool has been used properly and does not show signs of abuse.
